# PORTABLE LIGHTING

We love the touch of nostalgia given to the Jack lantern, with its flexible leather handle and brass frame. The crystal lighting features baguette cut prisms, which accentuate the lighting and gives it a unique character. It may be reminiscent of a kerosene lamp, but the Jack lantern comes with all the updates for a 21st century lamp. Equipped with long-lasting LED light, it's built to give you many hours of use. You can place it in the garden or bedroom without having it look out of place. Designed for portability, it can be recharged with the battery lasting up to seven hours. Recharging is easy, and you can do so by USB just like your smartphone, making it ultra convenient, eco-friendly and stylish. **For more information, visit Windfall at [windfall-gmbh.com](http://windfall-gmbh.com)**

## Keeping Things Simple

Digital music has revolutionised how we enjoy music, allowing us to create our own playlists with easy steps. In addition to that, we have access to thousands of Internet radio stations from around the world. With the BeoSound Essence, you can enjoy fuss-free access to digital music. All you need are active speakers linked to this little remote that can be placed in any part of your home. The sleek, pared down design of the remote is exemplary of the brand's clean yet outstanding design. A hideaway box is the centre for your streaming platforms, such as AirPlay streaming, Spotify Connect and DLNA streaming. Simplifying the way we experience music, as well as enhancing our enjoyment of digital music with B&O's speakers, the BeoEssence is a must-have for the modern music lover. **For enquiries, contact Bang & Olufsen at 6737 7500.**

## Love Birds

From their delicate structure to the colours of the plume, birds are beautiful and graceful animals that have also been a well-loved motif in interior design over the decades. With today's emphasis on natural and organic living, birds have increased in popularity again. Perfect for the walls, cushions or home accessories, they add vibrancy and life to any interior. The Birds N Bees printed linen from UK design studio Timorous Beasties combines birds, bees and flowers for a visually engaging design. These are set against a monochrome patterned background, letting the colours of the flora and fauna pop. Looking to refresh your interior? Use the fabric, made from nylon and 90 per cent linen, for light upholstery or drapery. **For more information, visit [Bode at bode.com.sg](http://Bode.com.sg)**
