

Contemporary Crystal Lighting

Dutch born Roel Haagmans and German Clarissa Dorn were already experienced chandelier designers for other companies when they set up WINDFALL together in Munich in 2004, to explore the contemporary potential of crystal chandeliers. All products are handcrafted and have a character of their own.

WINDFALL is known worldwide as the dynamic contemporary chandelier brand, which is redefining the nature of crystal chandeliers.

Manufacturing

WINDFALL designs are manufactured with the best Crystal available, but also other materials like Murano Glass, handmade Antique Glass, Alabaster, Aluminium, Silicon, Wood or Silk in different combinations are possible.

All metal work is done in brass, aluminium, or stainless steel for large fixtures, and we can do all kinds of surface finishing: 24 carat Gold, Nickel, Chrome, Silver plating, antique finish...

Lighting Design

WINDFALL is not only manufacturing their own design but also working close to the architects and interior designers, translating their sketches into decorative lighting objects or architectural modules based upon our experience in developing something completely new.

It goes without saying that we are also able to design and produce chandeliers in every classical or Arabian style.

Project Controlling

Together with the architects and designers at site we offer to take care of the whole decorative lighting concept and find the adequate solution for every situation.

Visualisation

Based upon technical "AutoCAD" drawings or sketches from your side we are able to present 3D photorealistic renderings to visualise ideas.

An extract out of our project list:

British Airways First Lounges at Terminal 5+3 Heathrow, JFK New York, Washington, Houston, Vancouver, Toronto Roberto Cavalli, Paris, Las Vegas, Florence, Qatar
