

## BESPOKE CHANDELIER DESIGNER WINDFALL OPENS NEW SHOWROOM IN MUNICH

If you've ever found yourself arrested by the beauty of a glittering, contemporary crystal chandelier in a luxury hotel, airport or even your favorite watch or jewelry boutique, you just might have been admiring a lighting fixture designed by Windfall, one of the world's leading contemporary lighting fixture designers.

Windfall is the brainchild of Clarissa Dorn and Roel Haagmans, who founded Windfall Contemporary Crystal Lighting in Munich in the summer of 2004. Windfall's trademark is their use of traditional crystal lighting design in a distinctively contemporary idiom, and their work has spread around the world.

The company's projects have included casinos, Terminals 5 and 3 at London Heathrow, Cartier International, the Royal Albert Hall and Montblanc International, as well as private residences.

The new showroom opened on 11 September with guests in attendance from over 20 countries, and provides a location where it's possible to display Windfall's dramatic crystal chandeliers, as well as functioning as the firm's world headquarters.
